

# Breeza®

Flavored Beverage  
for Neutral Abdominal/Pelvic Imaging

Beekley  
Medical®  
when your diagnosis  
must be right®

Breeza® flavored beverage for neutral abdominal/pelvic imaging was designed by a radiologist to overcome the disagreeable taste and texture patients experience in other commonly used distending agents.

## A lemon-lime flavored beverage, Breeza is preferred among enterography patients for its flavor and low viscosity

- Preferred by 21 of 23 members of Crohn's Disease Focus Panel<sup>1</sup>
- Improved drinking compliance among pediatric patients<sup>2</sup>
- Reduced nasogastric intubations among enterography patients from 7% to 1%<sup>3</sup>

*"We see 15 to 20 patients a month for enterography studies and they prefer the taste of Breeza flavored beverage for neutral abdominal/pelvic imaging over our previous contrast agent. Children drink it better and hold it down thanks to the lemon-lime flavor. With patients completing the drinking protocol, we can provide a better diagnosis. Our staff can focus on other tasks at hand instead of coaching and cleaning up from the patient getting sick. Knowing we are giving something more palatable to our patients eliminates the risk of falling behind with our exams."*

~ MRI Technologist, Baltimore, MD

REF 221

QTY 24-16.9 FL OZ (500 mL) bottles per case  
sugar-free, gluten-free

Used in CT and MRI with adult  
and pediatric patients
